

It can customize and develop all kinds of remote controls for industrial applications according to customer requirements.

1. Focus on wireless radio controls for industrial applications technology for 16 years
2. You can choose from many styles of radio controls
3. Controllable proportional valve and frequency converter; PLC, motor and other equipment
4. The radio control has many output modes to choose from: 485, 232, CAN, switch value + analog value.
5. The customization period is short, generally 15 working days.
6. There is no limit to the number of customizations, and the minimum order quantity is 1 set.

Nanjing Xiading Electronic Technology Co., Ltd.

Wireless radio controls for industrial applications

Selection manual

Radio controls for industrial applications.

NANJING XIADING ELECTRONIC TECHNOLOGY CO.,LTD

Nanjing Xiading Electronic Technology Co., Ltd. is the leading manufacturer of wireless remote control systems in the world. Xiading Company has accumulated more than ten years of professional and technical experience in R&D, manufacturing and sales of industrial radio controls. It has passed the certification of most major industrial countries in the world, such as the European Union, the United States, Britain, Japan, Canada, Italy, Portugal, Belgium, etc. Its products are sold in more than 60 countries and regions in the world, such as Europe, America, Asia and Australia.

With long-term accumulated solid experience, we firmly believe that most industrial equipment can realize wireless operation, and are committed to providing customers with competitive, safe and reliable products in the fields of lifting equipment, metallurgy, construction machinery, automobile manufacturing, paper making, shipbuilding, nuclear power generation and construction machinery.

What have we brought to the world?

Create value for customers

Xiading Electronics is committed to providing high-quality and innovative solutions to meet customer needs.

Promote sustainable social development

As a responsible corporate citizen, we are committed to the wireless transmission of global industrial electrical instructions and the elimination of the shackles of equipment cables. Promote the concept of green and low-carbon environmental protection, and provide customers with leading energy-saving and environmental protection products and solutions from product planning, design, R&D, manufacturing, delivery and operation and maintenance. Energy saving and efficiency improvement are our DNA.

Promote the sound development of the industry

Xiading Electronics advocates openness, cooperation and win-win, cooperates with customers, partners and friends to innovate, expands industrial value and forms a healthy and benign industrial ecosystem. Join many standards organizations, industry associations and open source communities, actively participate in and support the formulation of industry standards and the protection of intellectual property rights, and build a win-win ecological circle. Facing the development trend of wireless remote control, we will cooperate with industrial partners to promote the sustainable and sound development of the industry.

Promote economic growth

Xiading Electronics not only brings direct tax contribution to the host country, but also promotes local employment. More importantly, it creates wireless command transmission of industrial equipment through innovative solutions, promotes intelligent transformation of the industry, promotes economic growth, and improves people's quality of work and life.

Employee value proposition

Xiading Electronics provides employees with a platform for career and personal development in various ways, including corporate culture, employee welfare, teamwork, job challenges and ability improvement. What we are interested in is your excellent ability to serve customers.

Corporate honor

Xiading Electronics will continue to focus on the wireless remote control system of electrical command and the intelligent terminal control system of electrical automation, and make steady and continuous investment in products, technologies, basic research, engineering capabilities, standards and industrial ecology, adhere to the customer-centered principle, live up to the historic opportunity generously given to us by the times, and build the cornerstone of the company to build safer and more convenient wireless command products and intelligent control systems.

Research and development

Xiading is committed to transforming leading technology into better and more competitive product solutions to help customers achieve business success, thus driving their own human resources and financial indicators to increase value.

Xiading has made some research achievements in future-oriented basic research and innovation, hoping to contribute to the development of the industry with the help of technological innovation breakthroughs, and will continue to actively explore wireless and intelligent, and make progress in command wireless exchange and intelligent control.

Xiading and the world's outstanding resources jointly carry out open and innovative cooperation to jointly promote the development of wireless and intelligent technologies. We are open and cooperative with many research institutes, units and scholars in various professional fields such as product industrial design, wireless data transmission and intelligent control, adhere to open technological innovation, promote win-win cooperation between production, education and research, give attention to personnel training, develop advanced algorithms, and solve basic problems of technology development, manufacturing process and practical application by using basic physics concepts. .

Q Series wireless remote controls for industrial applications

Safe •Reliable

Wireless narrow frequency design, adjacent frequency can not interfere, switched power supply system;
Programmable output setting without fear of instantaneous voltage drop of line;
Fully meet your needs independent emergency stop button;
When pressed, the system will unconditionally stop the design of SmartRF high frequency module;
Ultra-high-level European code buttons built in the channel can be changed at will;
Effectively press up to 10 million single/two-speed and up to 12-point control buttons;
Fully meet your needs, hidden high-efficiency antenna;
It is not easy to break and the effective distance is higher than 100M,
The transmitter can directly copy the receiver without professional equipment;
Safe, simple and efficient industrial grade PA shell, impact-resistant, waterproof and oil-proof;
Complete compliance with IP66/NEMA international standards.

Specification

Transmitter specification

Frequency: 433/480 MHz
Transmitter RF power: less than 10mW
Remote control distance: 100M
Power supply: LR (AA) 1.5 Vx2 DC3V
Modulation mode: GFSK
Frequency control: PLL
Antenna impedance: 50 Ω
Instruction response time: less than 100ms
Stop command response time: less than 100ms
Average power consumption: 8mA @ DC3V
Operating temperature:-35 °C--+ 75A °C
Shell material: Industrial PA6+30% GF
Protection level: IP65

Receiver specification

Frequency: 433/480 MHz Shell Material: Industrial PA6+30% GF
Receiving sensitivity:-112dBm Protection level: IP65
Remote control distance: 100M
Modulation mode: GFSK
Frequency control: PLL
Antenna impedance: 50 Ω
Reaction time: 20-100MS
Capacitance: 5A @ 250V
Power supply: AC/DC24V - 48V(50HZ~60HZ)
AC/DC24V - 264V(50HZ~60HZ)
AC/DC110V-460V(50HZ~60HZ)
DC12~24V
Average power consumption (standby) 15mA @ AC220V
Operating temperature:-35 °C--+ 75 °C

•Ergonomic and lightweight •High safety and reliability •Wireless remote control pairing

- The application of programmed functions and parameters can be used by computer interface to change the required function settings.
- Multiple safety protection design, over 4.3 billion never-repeat safety codes, fault self-diagnosis and automatic frequency locking tracking.
- Synchronous encoding and decoding data transmission technology, with software to eliminate interference, debug and correct functions.
- Up to 200 sets of channels that can be set by the user's own computer.
- The transmitter buttons can be pressed continuously for 2 million times, which is absolutely sturdy and durable.
- Low power consumption design: it can be used for 3 months with two No.5 batteries
- The operating distance is 100 m (the computer software can adjust the maximum 500 m)
- The receiver can automatically search for the transmitter channel function, and the replacement of the transmitter does not need professional equipment pairing.
- The transmitter and receiver are built-in antennas (the receiver can be equipped with external antennas separately)
- Industrial grade reinforced nylon shell, high temperature resistance, waterproof, oil-proof fully comply with IP65/NEMA international specifications.

Q5000-Double-Rocker Joystick transmitter

Product function

2 5-gear cross operating levers with zero position detection function

2 two-position head-shaking switches, 1 three-position knob selector switch, 4 buttons, 1 emergency stop button, 1 power switch, 1 start button

The number of remote control action function points can be up to 40 actions

Q5000 double-rocker radio control is one of the most advanced and diversified industrial radio controls at present. It is suitable for engineering applications of double-hook multi-speed and multi-function lifting equipment and handling equipment.

✧ Super safety design, more than 4.3 billion kinds of never-repeat safety codes, fault self-diagnosis and automatic frequency locking tracking, etc.

✧ The extraordinary communication design, synchronous encoding and decoding data transmission, with software to eliminate interference, debug, correction functions.

✧ The use of advanced processors with built-in multi-bit Hamming codes: high speed, safe Height, Height accuracy, and 100 percent error-free encoding and decoding.

✧ Strongly reinforced fibre plastic enclosure: Rugged transmitter and receiver enclosures that prevent damage from strong impact and frequent drops.

✧ A super waterproof and oil resistant rating: Launch and receive in full compliance with IP66/NEMA4 international specifications.

✧ Intelligent active safety function design: such as failure to start when switch/rocker and other components fail, reinforced watchdog automatic stop device, countermeasures to prevent sudden power cut-off, etc.

✧ Full compliance with FCC Article 15 European Union safety standards.

Technical specification

Frequency: 433MHz
Encoding/decoding: microcomputer processor
Hamming code: > 4
Receiver sensitivity: -116dBm
Reaction time: 50ms
Output contact: 250V @ 5A
Receiver power consumption: 7-20VA
Receiver supply voltage: AC/DC24-48V.
110-460V @ 50/60 Hz
Charger power consumption: 0.3-5VA
Receiver weight: 2.42 k
Transmitter size: 247mm (length) x 145mm (width) x 180mm (height)

Receiver specification

Frequency interval: 25KHZ
Effective operating range: > 100 m
Frequency control: phase lock circuit
Antenna four-match impedance: 50ohms
Transmit power: 1.0 mW
Transmitter voltage: 7.4 V
Charger supply voltage: AC100-240V @ 5-60Hz
Transmitter fumigation: 1.48 kg (including battery)
Operating temperature: -25 C-75 C
Receiver size: 345mm (length) x 260mm (width) x 100mm (height)

Q9000-proportional Joystick transmitter

(Length)245mm X (Width)140mm X (Height)180mm

The Q9000 Series Remote Control is a compact multi-function custom transmitter that can be easily customized to your needs. Using its modular design. All control elements are carefully sized and arranged to facilitate long-term and frequent use without fatigue.

✧ Super safety design, more than 4.3 billion kinds of never-repeat safety codes, fault self-diagnosis and automatic frequency locking tracking, etc.

✧ The extraordinary communication design, synchronous encoding and decoding data transmission, with software to eliminate interference, debug, correction functions.

✧ The use of advanced processors with built-in multi-bit Hamming codes: high speed, high security, high accuracy and 100 percent error-free encoding and decoding.

✧ Shell of reinforced fibre plastic: The rugged transmitter prevents damage from strong impact and frequent drops.

✧ Intelligent active safety function design: such as failure to start when switch/rocker and other components fail, reinforced watchdog automatic stop device, countermeasures to prevent sudden power cut-off, etc.

✧ A super waterproof and oil resistant rating: Launch and receive in full compliance with IP66/NEMA4 international specifications.

Product function

- Support 8 analog signal transmission (optional cross rocker, one-word pull lever or knob potentiometer).
- Up to 24-channel switches input points.
- Display screen can be installed.
- One-to-one or one-to-many can be realized.

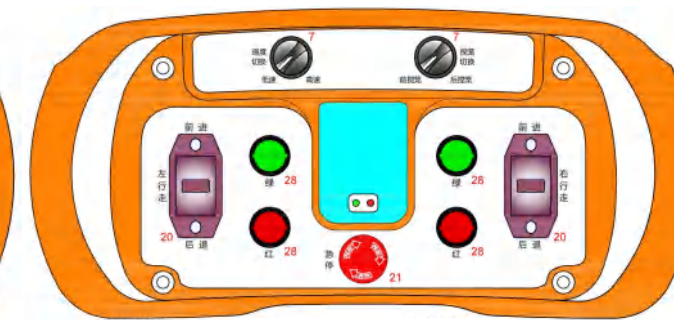

It can be customized according to customer needs.....

Introduction to Customized Icons

(Custom Figure 1)

(Custom Figure 2)

Scope of application

Truck cranes, aerial work vehicles, crawler cranes, grinders, shotcrete machines, distributors, ship unloaders, agricultural tractors, track-laying machines, tower cranes, mobile crushers, pump trucks, towing pumps, drilling rigs, AGV, sanitation trucks, fire engines, electric construction vehicles, agricultural equipment, special robots, engineering vehicles, train locomotives, special drilling equipment and other equipment requiring remote control.

L300 Series Joystick transmitter

(Length)310mm X (Width)190mm X (Height)180mm

Product function

- Support 16 analog signal input (can be externally connected with cross rocker, one-word pull lever or knob potentiometer)
- Up to 48 switch signal input points.
- Support LED lamp indication (operation indication, battery status, fault status, feedback switching value)
- Display screen can be installed

The L300 Series Telecontrol Transmitter is a powerful, feature-rich transmitter that contains many control elements and functional markers. With modular design, it combines flexible technology design and many value-added features, and can be easily adjusted to suit your requirements.

✧ Super safety design, more than 4.3 billion kinds of never-repeat safety codes, fault self-diagnosis and automatic frequency locking tracking, etc.

The extraordinary communication design, synchronous encoding and decoding data transmission, with software to eliminate interference, debug, correction functions.

The use of advanced processors with built-in multi-bit Hamming codes: high speed, high security, high accuracy and 100 percent error-free encoding and decoding.

Shell of reinforced fibre plastic: The rugged transmitter prevents damage from strong impact and frequent drops.

Intelligent active safety function design: such as failure to start when switch/rocker and other components fail, reinforced watchdog automatic stop device, countermeasures to prevent sudden power cut-off, etc.

A super waterproof and oil resistant rating: Launch and receive in full compliance with IP66/NEMA4 international specifications.

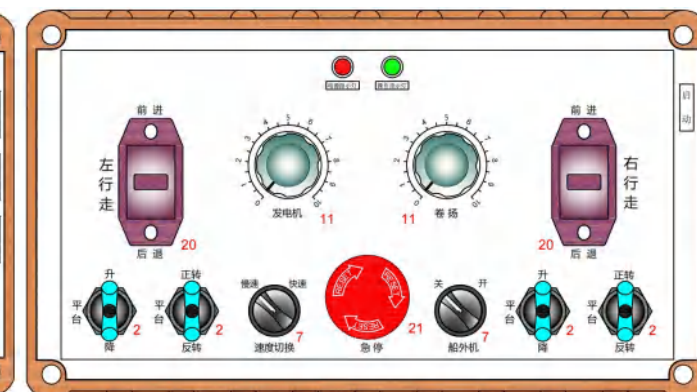

It can be customized according to customer needs.....

XDA series-Handheld analog knob

Hand-held analogue

PRODUCT FUNCTION

- Support 4 channels of analog signal output
 - Support 6 channels/14 channels of switch output
 - The display content can be customized
 - The wireless WIFI module can be used to change parameters
 - Can realize one-to-one or one-to-many
- Selectable communication methods: Modbus RTU485, CAN2.0B wireless remote control pairing
- The receiver can automatically search the transmitter channel function, and no professional equipment pairing is required to replace the transmitter.
- The transmitter button can be pressed continuously for 2 million times, making it absolutely sturdy and durable.
- Synchronous encoding and decoding data transmission technology, with software interference elimination, error detection, and correction functions.
- Multiple security protection design, more than 4.3 billion never-repeated security codes, self-defeating. Diagnostics and automatic frequency lock tracking.
- Industrial-grade reinforced nylon shell, high temperature resistance, waterproof and oil-proof. IP65/NEMA international specification.

LBA series-display model

Display model

Specification

Technical specifications

Shell: Industrial PA6+30%GF
Protection level: IP65
Transmitter specifications:
Frequency: 433MHz
Transmitter RF power: less than 10mW
Power supply: LR (AA) 3.7Vx2 DC7.4V
Modulation method: GFSK
Frequency control: PLL
Temperature range: -35°C~+75°C
Transmitter power supply: 2 alkaline AA batteries
Transmitter size: 192*76*40mm

Receiver specifications

Shell: Industrial PA6+30%GF
Protection level: IP65
Receiving sensitivity: -112dBm
Modulation method: GFSK
Frequency control: PLL
Antenna impedance: 50Ω
Capacity: 5A@250V
Power supply: AC/DC 9-24V
Average power consumption (standby) 15mA@AC220V
Temperature range: -35°C~+75°C
Voltage: 0-5V 0-10V inching self-locking (optional)
Transmitter size: 166*110*56mm
*The specific dimensions are subject to the actual object.

Application scope

Welding and cutting, submerged arc welding, gas arc welding, gas shielded welding wireless remote control, welding machine operator, special plane, cross wireless remote control, pump truck, towing pump, drilling rig, AGV, sanitation truck, fire truck, electric construction truck , agricultural equipment, special robots, engineering vehicles, special drilling equipment and other equipment that require remote control.

BQ series-explosion-proof remote control

Explosion-proof remote control

Model: BQ600
6-point single/double speed button
L 190×W 72×H 40mm
Weight:0.28kg

Model: BQ1200
12-point single/double speed button
L 239×W72×H 40mm
Weight:0.36kg

PRODUCT FUNCTIONS

- 2-12 single/double speed switching values
- Fully explosion-proof/semi-explosion-proof optional
- Optional output 485, 232, CAN
- Can achieve one-to-one or one-to-many
- Ergonomic and lightweight** •**High security and reliability**
- Wireless remote control pairing**
- The application of functions and parameters can be programmed through the computer interface and the required function settings can be changed
- Multiple security protection design, more than 4.3 billion never-repeated security codes, fault self-diagnosis and automatic frequency locking tracking
- Synchronous encoding and decoding data transmission technology, with software interference elimination, error detection, and correction functions
- The transmitter button can be pressed continuously for 2 million times, making it absolutely sturdy and durable.
- The standard operating distance is 100 meters (other control distances can be customized)
- The receiver can automatically search the transmitter channel function, and no professional equipment pairing is required to replace the transmitter.
- Industrial-grade reinforced nylon shell, high temperature resistance, waterproof and oil-proof, fully compliant with IP66/NEMA international specifications.

Explosion-proof type:

Explosion-proof is divided into three categories

- I: Underground electrical equipment in coal mines;
- II: electrical equipment for all other explosive gas environments except coal mines and underground mines.
Class II can be further divided into Class IIA, IB, and IIC. Equipment marked IIB can be applied to the use conditions of IIA equipment; IIC can be applied to the use conditions of IIA and IB.
- III: Electrical equipment in explosive dust environments other than coal mines.
Class IA: flammable flying dust; Class IB: non-conductive dust; Class IIIC: conductive dust.

Specification

Transmitterspecifications

Frequency: 433/480MHz
Transmitter RF power: less than 10mW
Remote control distance: 100M
Power supply: LR (AA) 1.5Vx2 DC3V
Modulation method: GFSK
Frequency control: PLL
Antenna impedance: 50Ω
Command response time: less than 100ms
Stop command response time: less than 100ms
Average power consumption: 8mA@DC3V
Operating temperature: -35°C - +75A°C
Shell material: Industrial PA6+30%GF
Protection level: IP65

Receiver specifications

Frequency: 433/480MHz Shell material: Industrial PA6+30%GF
Reception sensitivity: -112dBm Protection level: IP65
Remote control distance: 100M
Modulation method: GFSK
Frequency control: PLL
Antenna impedance: 50Ω
Response time: 20-100MS
Capacity: 5A@250V
Power supply: AC/DC24V - 264V AC/DC110V-460V
AC/DC 9-24V AC/DC 36-480V
Average power consumption (standby) 15mA@AC220V
Operating temperature: -35° C - +75° C

Receiver

With Explosin-proof Certificate

Complete qualifications

Various types of industrial remote controls can be customized and developed according to customer requirements (some cases)

7-position knob + 6 buttons	4 knobs + 2 buttons	3 knobs + 7 buttons	1 knob + 12 buttons
			
3 analog + 4 knobs	10-way switch + indicator light	3-way switch + indicator light	4 knobs + 4 buttons
			
16 knobs	10 knobs and 8 switches	8 knobs+8 buttons	5-speed selection + two-speed button
			
1 knobs+11 single speed buttons	Display + 10 buttons	Display + 2 ratio knobs	Display multi-channel feedback
			

Downhole mobile robotic arm	Aerial work vehicle
	
European style driving	bBridge building machine
	
Crane	Ground grinder
	
Smart forklift	Crawler crane
	
Crawler walking machine	Intelligent track car
